

# Futuremax Technologies

We Build Your Future Secure

Futuremax technologies is a high technology enterprise, engaged in sales for Telecommunication, safety and security products.

Our products with high quality and high performance have gained a good reputation in the circle. Also we have a strong sales team with professional skills and knowledge, which has made our business extend rapidly. Our technical support team can provide pre-sales and after-sales service to customers at any time. . So we would like to cooperate with you in the long run and create a brilliant future for all of us.

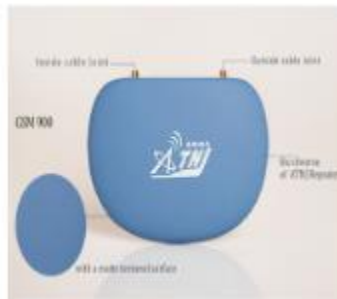

We offers a great variety of mobile phone signal boosters and you can find the most suitable model for your needs! Our boosters work with all signal types and help to amplify calls (GSM, DCS) or internet connections (2G). The level of mobile signal will improve up to the maximum in any area, either inside the house or in the yard, in the garage or office, etc...

Our Company has more working experience in the sphere of equipment for cellular signal amplification. The company is an official representative of such well-known mobile phone signal booster brands as ATNJ.

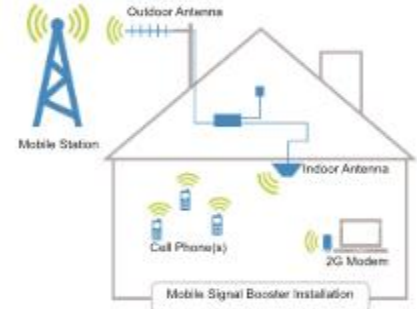

## Mobile Signal Booster

GSM Band FT102A

Part list GSM 900

## Installation Method

The installation of the Signal Booster can be done manually, though some minor skills are required. Please, follow the guidelines in the manual carefully to safely install the amplifier. Note that for effective booster functioning the external antenna should be mounted in a place where signal reception is strong and stable enough - preferably 2-3 bars.
